

# Drones on rent for farmers

Jaipur, January 22

**LOW INCOME GROUP** farmers in Rajasthan will be provided drones on rent that will help them monitor crops and spray chemicals in a wide agricultural area with less cost and time. Around 1,500 drones will be made available to farming centres by the state government in two years.

Drone on rent to such farmers who have limited income and cannot afford advanced and expensive drones, Sharma said.

Principal secretary, agriculture and horticulture, Dinesh Kumar, said the use of artificial intelligence and drones for agricultural work is increasing all over the world and in the state also, the government is promoting the use of technology to enable farmers increase their income and yield.

Another official said 70 to 80% water can be saved by spraying with drones. "Deficiency of nutrients in the standing crop can be determined and replenished easily," Agriculture Commissioner Kana Ram said.

"Progressive farmers of the state have already started using drones in agriculture. In the coming time there will be a huge increase in the demand and utility of drones in agriculture," he said. "Looking at this, the government has decided to pro-

vide drones on rent to such farmers who have limited income and cannot afford advanced and expensive drones," Sharma said. In conventional agricultural practices, pesticides are sprayed either manually or with the help of tractor-mounted sprayers. Drone-spraying requires less quantity of water, as well as pesticides.
